

Senate Natural Resources, Environment and Great Lakes Committee Members,

Please be advised of my support for the Senate Bill to amend P.A. 451. This bill is very important to us who believe that the MDNR is securing way to much property in our State. I believe the State of Michigan should be limited in the amount of acreage they may retain. It does the counties or townships little good when so much of their property is being swallowed up by our State, and they have no possability to collect property taxes on these propeerties. As equine trail riders we are severly limited to the properties that the MDNR allows us to ride on, and increasing the land aquisitions will not make it any better. This constant growth of government land must stop.
